

No Rails. No Clamps. No Problem.

IronRidge FX revolutionizes solar installation by completely removing both rails and clamps from the mounting system. FX uses Mounts and Bridges to structurally support and electrically bond solar modules into a single, interconnected array.

The entire installation requires just one tool, with most steps being tool-free.

Rail & Clamp Free

Instantly attach modules with GripFit Technology™.

UL 2703 Listed System

Entire system and components meet latest UL 2703 standard.

Level at Anytime

Adapt to roof undulation and fix other leveling challenges at any time.

PE Certified

Pre-stamped engineering letters available for most states.

Single-Tool Installation

Use the same socket size on all parts, from lag to lug.

20-Year Warranty

Twice the protection offered by competitors.

Components 

Mount FX

Instantly connect solar modules to roof attachments.

- GripFit Technology™ bonds modules without fasteners.
- 360° pivot capability for N-S and E-W flexibility.
- Built-in leveling feature works at anytime.

Bridge FX

Structurally and electrically connect adjacent modules.

- GripFit Technology™ bonds modules without fasteners.
- Flexible E-W placement capability.
- Slot for grounding lug attachment.

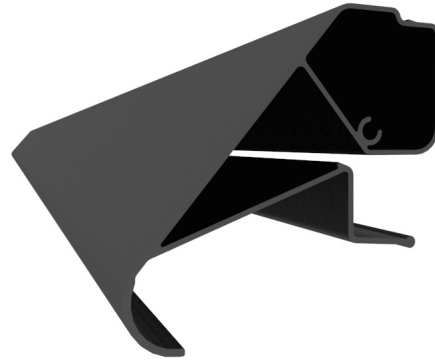

Flash FX

Provide structural anchors with complete water protection.

- Water seal elevated an entire inch above roof plane.
- UL441 rain tested and TAS-100 wind-driven rain tested.
- Corrosion resistant parts for lifelong performance.

Trim FX

Provide a seamless and finished appearance.

- Completely tool-free installation.
- Aids in installing first row of modules.
- End caps available to complete the look.
